

VIMALA COLLEGE (AUTONOMOUS), THRISSUR

B.Sc. DEGREE PROGRAMME IN PSYCHOLOGY

**UNDER CHOICE BASED CREDIT AND SEMESTER SYSTEM
(CBCSSUG 2019)**

SCHEME AND SYLLABUS

2020 ADMISSION ONWARDS

Course Structure of BSc Psychology

SEMESTER I

Sl.no	Course code	Course title	Total hours	Hours/week	Credits
1	PSY1A01	Common Course I-English	64	4	4
2	PSY1A02	Common Course II-English	80	5	3
3	PSY1A07	Common Course III-Language other than English	64	4	4
4	PSY1B01	Basic themes in Psychology-I	64	4	3
5	PSG1C01	Human Physiology I	64	4	3
6	STA 1C02	Descriptive Statistics	64	4	3
7	*Audit Course	Environment Studies	-	-	-
Total				25	20

SEMESTER II

Sl.no	Course code	Course title	Total hours	Hours/week	Credits
8	PSY2A03	Common Course IV-English	64	4	4
9	PSY2A04	Common Course V-English	80	5	3
10	PSY2A08	Common Course VI-Language other than English	64	4	4
11	PSY2B01	Basic themes in Psychology-II	64	4	3
12	PSG2C01	Human Physiology II	64	4	3
13	STA 2C02	Regression Analysis and Probability theory	64	4	3
14	*Audit Course	Disaster Management	-	-	-
Total				25	20

SEMESTER III

Sl.no	Course code	Course title	Total hours	Hours/week	Credits
15	PSY3A05	Common Course VI-English	80	5	4
16	PSY3A09	Common Course VIII-Language other than English	80	5	4
17	PSY3B01	Psychological measurement and testing	48	3	3
18		Experimental Psychology Practical –I	32	2	**
19	PSG3C01	Human Physiology III	80	5	3
20	STA 3C02	Probability Distributions and Parametric tests	80	5	3
21	*Audit Course	Human Rights/Intellectual Property Rights/Consumer Protection****	-	-	-
Total				25	17

SEMESTER IV

Sl.no	Course code	Course title	Total hours	Hours/week	Credits
22	PSY4A06	Common Course IX-English	80	5	4
23	PSY4A10	Common Course X-Language other than English	80	5	4
24	PSY4B01	Individual Differences	48	3	3
25	PSY4B02	Experimental Psychology Practical –I	32	2	4
26	PSG4C01	Human Physiology IV	80	5	3
27	STA 4C02	Statistical techniques for Psychology	80	5	3
28	*Audit Course	Gender Studies/Gerontology****	-	-	-
Total				25	21

SEMESTER V

Sl.no	Course code	Course title	Total hours	Hours/week	Credits
29	PSY5B01	Abnormal Psychology-I	48	3	3
30	PSY5B02	Social Psychology	48	3	2
31	PSY5B03	Developmental Psychology -I	48	3	3
32	PSY5B04	Psychological Counseling	48	3	3
33	PSY5B05	Health Psychology	48	3	3
34		Open Course	48	3	3
35		Experimental Psychology Practical- II	48	3	***
36		Experimental Psychology Practical –III	48	3	***
37		Project	16	1	
Total				25	17

SEMESTER VI

Sl.no	Course code	Course title	Total hours	Hours/week	Credits
38	PSY6B01	Abnormal Psychology II	64	4	3
39	PSY6B02	Applied Social Psychology	64	4	3
40	PSY6B03	Developmental Psychology II	48	3	3
41	PSY6B04	Life Skill Education: Applications and training	48	3	3
42	PSY6B05	Elective	48	3	3
43	PSY6B06	Experimental Psychology Practical – II	48	3	4
44	PSY6B07	Experimental Psychology Practical- III	48	3	4
45	PSY6B08	Project	32	2	2
Total				25	25

It is advisable to submit a report during the end of Vth semester on the basis of the study tour conducted to various institutions comprising psychotherapeutic centres, managerial training institutions etc so as to familiarize the students, the application of Psychological principles and theories in different specializations.

*Course with 4 credits which is not meant for class room study and its credits are not counted for CGPA or SGPA

**External examination will be conducted at the end of IVth semester

***External examination will be conducted at the end of VI th semester

**** Colleges can opt any one of the courses

Elective Papers

1. PSY6B05-01 Organisational Behaviour
2. PSY6B05-02 Psychology of Criminal Behavior
3. PSY6B05-03 Positive Psychology
4. PSY6B05-04 Educational Psychology
5. PSY6B05-05 Cognitive Psychology

Open Course

Choice I

Code:PSY5D01 Psychology and Personal Growth

Choice II

Code:PSY5D02 Life skill Applications

Choice III

Code: PSY5D03 Child and Adolescent Mental Health

Mark Distribution for Core Courses, Project and Open Course

Core Courses(including electives)	17x75	1275
Project		50
Open course		75
Total Marks		1400

DETAILS OF COURSES

CORE COURSES

- PSY1B01:Basic Themes in Psychology-I
- PSY2B01: Basic Themes in Psychology-II
- PSY3B01:Psychological Measurement and Testing
- PSY4B01: Individual Differences
- PSY4B02:Experimental Psychology Practical I
- PSY5B01:Abnormal Psychology I
- PSY5B02:Social Psychology
- PSY5B03:Developmental Psychology I
- PSY5B04:Psychological Counselling
- PSY5B05:Health Psychology
- PSY6B01: Abnormal Psychology II
- PSY6B02:Applied Social Psychology
- PSY6B03:Developmental Psychology II
- PSY6B04: Life Skill Education:Applications and Training
- PSY6B06:Experimental Psychology Practical II
- PSY6B07: Experimental Psychology Practical III
- **PSY6B08 :PROJECT**

Complementary Courses of BSc Psychology Programme

Following are the complementary courses of BSc Psychology Programme suggested by the board and the syllabus of these complementary courses are prepared by the respective Board of studies.

- Human Physiology
- Statistics

Audit Courses

- Environment Studies
- Disaster Management
- Human Rights/ Intellectual Property Rights/consumer Protection
- Gender Studies/ Gerontology

Open Courses

During the Vth Semester three Open courses are offered to the students of other departments. Colleges can choose any one course from the three listed below.

- PSY5D01:Psychology and Personal Growth
- PSY5D02:Life Skill Applications
- PSY5D03: Child and Adolescent Mental Health

Elective Courses

During VIth Semester five elective courses are offered for Bsc Psychology Programme. Colleges can choose any one course from the five listed below.

- PSY6B05-01:Organisational Behavior
- PSY6B05-02:Psychology of Criminal Behavior
- PSY6B05-03:Positive Psychology
- PSY6B05-04:Educational Psychology
- PSY6B05-05: Cognitive Psychology

Complementary Courses offered by Board of Studies in Psychology to other departments

- PSY1C05/PSY2C05: Psychological Processes
- PSY3C05/PSY4C05:Psychology of Abnormal Behavior and Social Behavior
- PSY1C06/PSY2C06 : Social Behavior
- PSY3C06/PSY4C06: Life Span Development and Health Psychology
- PSY3C07/PSY4C07: Abnormal Behavior
- PSY3C06/PSY4C05: Life Span Development and Psychology of Social Behavior

EVALUATION SCHEME FOR CORE AND OPEN COURSES

The evaluation scheme for each course shall contain two parts

- 1) Internal assessment
- 2)External Evaluation

20% weight shall be given to the internal assessment. The remaining 80% weight shall be for the external evaluation.

Internal Assessment : 20% of the total marks in each course are for internal examinations. The internal assessment shall be based on a predetermined transparent system involving written tests, Class room participation based on attendance in respect of theory courses and lab involvement/records attendance in respect of Practical Courses.

Internal assessment of the project will be based on its content, method of presentation, final conclusion and orientation to research aptitude.

Components with percentage of marks of Internal Evaluation of Theory Courses are- Test paper 40%, Assignment 20%, Seminar 20% and Class room participation based on attendance 20%

Table 1: Components for evaluation

Sl.No.	Components	Marks
1	Class room participation based on Attendance	3
2	Test paper	6
3	Assignment	3
4	Seminar/Viva	3
	Total	15

For practical courses - Record 60% and lab involvement 40% as far as internal is concerned. (if a fraction appears in internal marks, nearest whole number is to be taken)

For the test paper marks, at least one test paper should be conducted. If more test papers are conducted, the mark of the best one should be taken.

Table 2: Split up of marks for Test paper

Range of marks in test paper	Out of 6 Marks (Maximum internal marks is 15)
Less than 35%	1
35%-45%	2
45%-55%	3
55%-65%	4
65%-85%	5
85%-100%	6

Table 2: Split up of marks for Class Room Participation

Range of CRP	Out of 3Marks (Maximum internal marks is 15)
$50\% \leq \text{CRP} < 75\%$	1
$75\% \leq \text{CRP} < 85\%$	2
85% and above	3

External Evaluation

External evaluation carries 80 % of the marks. The Core courses, Electives and Open courses will have an external examination of 2 hours duration with 60 marks.

Scheme of Examinations

The external QP with 60 marks and Internal examination is of 15 marks. Duration of each external examination is 2 Hrs. The pattern of External Examination is as given below. The students can answer all the questions in Sections A & B. But there shall be Ceiling in each section.

Section A

Short answer type carries 2 marks each - 12 questions

Ceiling - 20 Marks

Section B

Paragraph/ Problem type carries 5 marks each - 7 questions

Ceiling – 30 Marks

Section C

Essay type carries 10 marks (1 out of 2)

1X10=10 Marks

MODEL QUESTION PAPER OF CORE COURSE FOR ALL SEMESTERS**FIRST SEMESTER B.Sc DEGREE EXAMINATION, NOVEMBER 2019****PSY1B01 BASIC THEMES IN PSYCHOLOGY I****Name:****Reg No:****Time: 2Hrs****Maximum Marks: 60****SECTION -A**

Answer **ALL** Questions. Answer in Two or three sentences. Each carries 2 marks. There shall be ceiling of 20 marks in this section

1. Placebo effect
2. Structuralism
3. Circadian rhythm
4. Self-awareness
5. Selective attention
6. Perceptual Organization
7. Meditation
8. Survey method
9. Figure-ground perception
10. Perceptual set
11. Phi-Phenomenon
12. REM sleep

(Ceiling 20 marks)

SECTION -B

Answer **all** questions. Answer in a paragraph of about half a page to one page .Each question carries 5 marks. There shall be ceiling of 30 marks in this section

13. Steps in scientific investigation
14. Types of variables.
15. Factors affecting attention.

16. Stages of sleep.
17. Discuss the different views on hypnosis
18. Explain cognitive learning
19. Theories of colour vision

(Ceiling 30 Marks)

SECTION –D

Essay Type Questions

Answer *Any one* of the following .Each Carries 10 Marks.

20. Define psychology. Explain in brief the history of psychology.
21. Explain the nature of consciousness. Give a brief description on altered states of consciousness.

.

(1 x 10= 10 marks)

DETAILED SYLLABI

B.SC PSYCHOLOGY

SEMESTER I

PSY1B01

Credits : 3

BASIC THEMES IN PSYCHOLOGY- I

64 hours

Objectives:

- To generate interest in Psychology
- To make familiar the basic concept of the field of Psychology with an emphasis on applications of Psychology in everyday life.
- To understand the basics of various theories in Psychology
- To provide basic knowledge about systems and processes like attention, learning and Consciousness.

Course Outcomes

CO1	To understand the origin and development of Psychology
CO2	To understand the research methods in Psychology
CO3	To understand the basic cognitive processes such as attention and perception
CO4	Identify the states of consciousness
CO5	To understand theoretical perspectives of learning
CO6	Understand how to modify learning experiences using learning principles including operant conditioning, classical conditioning, social and cognitive learning

Module 1 Introduction

16 hours

Psychology: A working definition.

Origin of Psychology: Philosophical origins; Early Indian and Greek thoughts, major ideas of Descartes, Locke. Biological origins; Darwin, Genetics. Brief history of modern scientific psychology: structuralism, functionalism, behavioral, psychoanalytic, humanistic, cognitive perspectives, Gestalt psychology. Branches of Psychology, Scope of Psychology.

Methods of psychology: Observation-participant and non-participant observation, naturalistic observation; Interview methods-structured, semi structured and unstructured interviews; Surveys; case study; Questionnaires; Correlational studies; experimental method.

Module 2 Attention and Perception

16 hours

Attention: selective and sustained attention; Factors affecting attention; Phenomena associated with attention-span of attention, division of attention, distraction of attention.

Sensation and perception: Difference between sensation and perception: sensory threshold; absolute threshold; difference threshold; just noticeable differences; subliminal perception.

Perceiving forms, patterns and objects: perceptual set, feature analysis, bottom-up processing, top-down processing.

Perceptual organization; Gestalt principles, figure and ground segregation, phi-phenomenon.

Perceptual constancies: size, shape, brightness constancies.

Visual illusions; Theories of colour vision; Theories of auditory perception.

Module 3 States of Consciousness

14 hours

Nature of consciousness; Biological rhythms: circadian rhythms; Sleep and waking cycle: stages of sleep; functions of sleep; functions of REM sleep; sleep disorders

Dreams: psychodynamic, physiological and cognitive views.

Altered states of consciousness: Hypnosis; **Meditation**. Altering consciousness with drugs- Brief outline on psychoactive drugs.

Module 4 Learning

18 hours

Concept of learning, Nature of learning, learning curve.

Types of Learning; Associative learning (Classical and operant conditioning) and Cognitive learning.

Classical conditioning: Basic experiment and basic terms; Principles of Classical conditioning- Acquisition, Higher order conditioning, Extinction, spontaneous recovery, Generalization and Discrimination. Applications of classical conditioning.

Operant conditioning; Law of effect; Basic experiment of Skinner; Reinforcement, Punishment, Shaping and Chaining; Schedules of reinforcement. Applications of operant conditioning.

Cognitive learning: Cognitive map; latent learning; sign learning.

Observational learning/ Modelling

B.SC PSYCHOLOGY**SEMESTER II****PSY2B01****Credits: 3****BASIC THEMES IN PSYCHOLOGY- II****64 hours****Objectives:**

- To generate interest in Psychology
- To make familiar the basic concept of the field of Psychology with an emphasis on the applications of Psychology in everyday life
- To understand the basics of various theories in Psychology
- To provide basic knowledge about systems and processes like cognition, memory, motivation and emotion.

Course Outcomes

CO1	To understand the basic elements of thinking, decision making and language
CO2	To understand the memory processes
CO3	To apply the memory techniques
CO4	To understand the theories of motivation
CO5	To identify the different kinds of emotion
CO6	To understand the theories of emotion

Module 1 Cognitive Processes**16 hours**

Basic units of Thought: Concepts; forming concepts, Types of concepts, prototypes; Images; Language, the structure of Language, Role of language in thinking.

Reasoning; Deductive and inductive thinking.

Problem solving; Types of problems, steps and barriers to effective problem solving, approaches or strategies of problem solving-trial and error, heuristics, algorithm, forming sub goals, searching for analogies, changing the representation of the problem ;Culture, cognitive style and problem solving. Creative thinking; convergent and divergent thinking; stages of creative thought.

Decision making; Heuristics and judgment-availability heuristics, representativeness heuristics, anchoring heuristics.

Module 2 Memory**18 hours**

Key processes in memory: Encoding, Storage and Retrieval.

Atkinson-Shiffrin Model; sensory memory, short term memory and long term memory; Levels of processing.

STM; Iconic memory; Working memory, Alan Baddeley's components of working memory; Chunking; Rehearsal-maintenance rehearsal, rote rehearsal, elaborative rehearsal.

LTM; Types of LTM-procedural memory, declarative memory-semantic memory, episodic memory; Flash-bulb memory, tip of the tongue phenomenon.

Implicit and explicit memory-priming.

Measuring memory; Recall, Recognition, Relearning.

Retrieval cues; Encoding specificity principle; Context dependent memory, State dependent memory; Serial position effect; Reconstructive memory; Source Monitoring; Eyewitness testimony; False memory; Metamemory.

Forgetting: Curve of forgetting; Reasons of forgetting-ineffective coding, decay, interference, retrieval failure, motivated forgetting; Repression.

Strategies for remembering; Rehearsal, Elaboration, Organisation (Mnemonics).

Module 3 Motivation

16 hours

Motivation; A model of Motivation; Sources of Motivation-Drives, Incentives, Instincts.

Theories of motivation: Drive theory; Incentive theory; Hierarchy of needs theory; Arousal theory-Yerkes-Dodson's Law; Goal setting theory; Evolutionary theory; Cognitive theories-Balance theory, Cognitive dissonance theory, Expectancy theory, Attribution theory.

Types of Motives; Biological motives and learned motives. The motivation of hunger and eating: Biological factors in the regulation of hunger; Environmental factors in the regulation of hunger: Sexual motivation; Hormones and human sexual behaviour; Sexual orientation.

Achievement motivation: Individual differences; situational determinants of achievement behaviour; Measuring achievement motivation.

Aggressive motive; Power motive; Affiliation motive. Intrinsic and extrinsic motivation.

Module 4 Emotion

14 hours

Emotion: The elements of emotional experience; The cognitive component, The physiological component; The behavioural component; Primary emotions; Positive emotions.

Emotion and the brain; Physiology and emotion; fight or flight, sudden death, lie detectors.

Expression of emotions; Facial expressions, non-verbal cues and body language; Assessment of emotions.

Theories of emotion: James-Lang theory; Cannon-Bard theory; Opponent process theory; Cognitive appraisal theories of emotion-Schachter's two-factor theory and Lazarus's theory of cognitive appraisal; Facial feedback hypothesis; Evolutionary theories of emotion.

B.SC PSYCHOLOGY**SEMESTER III****PSY3B01****Credits: 3****PSYCHOLOGICAL MEASUREMENT AND TESTING****48 Hours****Objectives:**

- To offer foundation on psychological measurement and testing
- To provide the basis of test construction and to build up skills on developing psychometric test
- To familiarize the uses of psychological tests
- To make aware of ethical principals in testing

Course Outcomes

CO1	To understand the basics of psychological measurement and testing
CO2	To understand the levels of measurement
CO3	To understand the different scaling methods
CO4	To understand the applications of Psychological tests
CO5	To identify a good Psychological test
CO6	To develop a standardized test

Module 1: Introduction to Measurement and Scaling Techniques**12 Hours**

Definition of measurement, Levels of measurement: Nominal, Ordinal, Interval and Ratio scales, Properties of scales of measurement: Magnitude, equal interval and absolute zero, Distinction between psychological measurement and physical measurement, Problems in psychological measurements.

Concepts of psycho physics: Absolute threshold, Difference threshold, Weber's law, Fechner's law, Psychophysical/ psychological scaling methods- Method of Average Error, Method of Minimal Changes, Method of Constant Stimuli, Method Of Pair Comparison, Method Of Rank Order.

Module 2: Nature and Use of Psychological Tests**10 Hours**

Definition of psychological test, Historical perspective of psychological testing

Uses of psychological test, Characteristics of a good test: Objectivity, Reliability, Validity, Norms, and Practicability, ethical issues in psychological testing, Factors influencing Test Administration- Examiner, Testing Conditions, Test Taker.

Classification of psychological tests: Speed test and power test, Individual and group tests, Verbal, Non-verbal and performance tests, culture specific and culture free tests, Objective and subjective tests.

Module 3: Test Construction and Administration

12 Hours

Introduction to steps of test construction- Planning, Writing, meaning and purpose of item analysis, Administration, Standardisation, Meaning of Reliability, Types of reliability, Meaning of Validity, aspects of validity – face validity, content validity; construct validity, criterion-related validity, Concept of Norms –norm referenced and criterion- referenced norms, types of norms- percentile, standard score, age equivalent, grade equivalent and T-score.

Module 4: Basics of Psychological research

14 Hours

Meaning and characteristics of scientific research, types of research: historical, basic versus applied research, experimental versus descriptive/non experimental.

Research Process- identifying the problem-types of problems, hypothesis- types of hypothesis, variables- dependent, independent, extraneous variables, formulating research design, reviewing the literature-sources of review, Sampling- fundamentals of sampling,

Data collection techniques-questionnaire and schedule, interview, content analysis, observation, rating scale, carrying out statistical analysis-difference between descriptive and inferential statistics, drawing conclusions.

Structure of a research report, APA style of writing research report

B.SC PSYCHOLOGY**SEMESTER III****32 hours****EXPERIMENTAL PSYCHOLOGY PRACTICAL I****Objectives**

- To nurture the ability in students to understand himself/herself and other persons.
- To develop the skills of testing and scientific reporting in psychology.
- To familiarize the students to various psychological tests and assessment tools.
- To generate an interest in working of the community with a psychological outlook

Course Outcomes

CO1	To develop the skills for assessment of individual differences
CO2	To develop the skills for assessment of attention
CO3	To develop the skills for assessment of perception
CO4	To develop the skills for assessment of memory

PART I**Attention**

1. Span of attention
2. Set in attention
3. Division of attention
4. Distraction of attention
5. Colour blindness test
6. Depth perception

Each student is required to conduct a minimum of 4 experiments from the above experiments and submit record for evaluation at the end of the fourth semester. The list includes experiments that measure attention and perception. Evaluation will be made at the end of fourth semester.

B.SC PSYCHOLOGY**SEMESTER IV****PSY4B01****Credits: 3****INDIVIDUAL DIFFERENCES****48 hours****Objectives:**

- To provide theoretical knowledge about systems and processes like intelligence and personality
- To understand the history of intelligence and Personality Testing
- To familiarize the student with various types of tests in Psychology

Course Outcomes

CO1	To understand the theoretical perspectives of Intelligence
CO2	To understand the assessment of intelligence, aptitude and attitude
CO3	To analyze the different Personality approaches
CO4	To understand the assessment of Personality

Module 1: Intelligence**12 hours**

Definition, nature and meaning of intelligence,. Determinants of intelligence – Role of heredity and environment. Theories of intelligence- Spearman-Two factor, Cattell- Fluid and crystallized intelligence, Guilford's structure of intellect model, Thurstone's –primary mental abilities, Sternberg- Triarchic approach, Gardner-Multiple intelligence theory, **Goleman's emotional intelligence theory.**

Module 2: Assessment of intelligence, Aptitude and achievement**10 hours**

Assessment of intellectual abilities-history of assessment- Sir Francis Galton, Alfred Binet, Lewis Terman – concept of IQ, intelligence tests-Stanford-Binet intelligence scale, Wechsler scale, Kaufman's Scale, Raven's Progressive Matrices, Bhatia's Test Of Intelligence, Seguin-Form Board Test, Extremes of intelligence

Define Aptitude and Achievement, Distinction Between Aptitude Test And Achievement Test, Uses Of Achievement Tests, Types Of Aptitude Test- DAT, GATB, Sensory Tests, Motor Dexterity Test .

Module 3: Personality**12 hours**

Concept of Personality, Psychodynamic approaches. Freud's theory: instinct theory, Levels of consciousness, structure of personality, defense mechanisms, psychosexual stages of development.

Jung: Structure of personality, Basic concepts in Individual Psychology. Horney: Basic anxiety, styles, feminist turn in psychoanalysis.

Trait and Type theories: general approach. Allport: traits. Cattell: source and surface traits,. Eysenck: dimensions of personality. Introduction to Humanistic perspective: Rogers, Maslow.

Module 4 : Assessment of Personality

14 hours

Meaning and purpose of personality assessment. Tools of personality assessment -Self report inventories, Strength and weakness of self report inventories, 16PF, MMPI ,EPQ: General outline about these tests. Questionnaires and Inventories, Projective measures of personality – Strengths and weakness of projective tests, TAT, Other measures: Behavioral Observation and Interviews, situational tests. Measurement of interest- types of interest tests, Strong Interest Inventory. Strengths and Weaknesses of Projective tests.

B.SC PSYCHOLOGY**SEMESTER IV****PSY4B02****Credits: 4****EXPERIMENTAL PSYCHOLOGY PRACTICAL I****32 hours****Objectives:**

- To nurture the ability in students to understand himself/herself and other persons.
- To develop the skills of testing and scientific reporting in psychology.
- To familiarize the students to various psychological tests and assessment tools.
- To generate an interest in working of the community with a psychological outlook

PART II**Illusion**

1. Horizontal-Vertical illusion
2. Muller-Lyer Illusion

Memory

- 3.Immediate memory span
- 4.Working memory scale
- 5.Children's memory scale
- 6.PGI Memory Scale
7. Weschler Memory Scale

Each student is required to conduct any of the above 4 experiments and submit record for evaluation at the end of the fourth semester. The list includes experiments that measure illusion and memory. Evaluation for Part I (III Sem) & Part II (IV Sem) will be made at the end of the fourth semester.

MODEL QUESTION PAPER FOR ALL PRACTICAL EXAMINATION S

Name:.....

Reg No:

PSY4B02**Experimental Psychology-I****Maximum Marks: 60****Time: 2Hrs**

Conduct any one experiment from the following. Write the introduction, plan, procedure, result and discussion.

1. Find out the immediate memory span of the subject
- OR
2. Find out the division of attention of the subject.

Pattern of evaluation of Experimental Psychology Practical II

External Evaluation		Internal Evaluation	
60 marks		15 marks	
Introduction	10 marks	Lab Involvement/Records Attendance	6 marks
Administration	15 marks		
Result and Discussion	15 marks	Record	9 marks
Record	10		
Viva Voce	10 marks		

B.SC PSYCHOLOGY**SEMESTER V****PSY5B01****Credits : 3****ABNORMAL PSYCHOLOGY-I****48 hours****Objectives:**

- To enable students to understand the concepts of abnormal behavior
- To develop awareness about different types of anxiety and stress disorders
- To encourage the students to know different therapeutic techniques in management of anxiety and stress disorders.

Course Outcomes

CO1	To understand the basic concepts of abnormal behavior
CO2	To identify the signs and symptoms of Stress disorders
CO3	To understand the causal factors of Stress disorders
CO4	To identify the signs and symptoms of Anxiety disorders
CO5	To understand the causal factors of Anxiety disorders
CO6	To identify the signs and symptoms of Personality disorders
CO7	To understand the causal factors of Personality disorders

Module 1: Basic concepts**8 hours**

Mental disorder, classification, Historical views of abnormal behaviour, causal factors- Biological- psychosocial and socio cultural

Module2: Stress disorders and anxiety disorders**10 hours**

Stress and stressors- Coping strategies, stress disorders: Adjustment disorder-Post traumatic stress disorder; Anxiety disorder: specific phobia, social phobias, Generalized Anxiety disorders, obsessive-compulsive disorder. Causal factors

Module 3: Somatoform and dissociative disorder**16 hours**

Somatic Symptom Disorders, Hypochondriasis, Somatization Disorder, Pain Disorder, Conversion Disorder; Dissociative Disorders - Depersonalization/ Derealization Disorder, Dissociative Amnesia and Dissociative Fugue, Dissociative Identity Disorder (DID). causal factors

Module 4: Personality disorders**14 hours**

Cluster A Personality Disorders-Paranoid Personality Disorder, Schizoid Personality Disorder, Schizotypal Personality Disorder. Cluster B Personality Disorders- Histrionic Personality Disorder, Narcissistic Personality Disorder, Antisocial Personality Disorder, Borderline Personality Disorder.

Cluster C Personality Disorders - Avoidant Personality Disorder, Dependent Personality Disorder, Obsessive-Compulsive Personality Disorder. Causal Factors.

B.SC PSYCHOLOGY**SEMESTER V****PSY5B02****Credits : 2****SOCIAL PSYCHOLOGY****48 hours****Objectives:**

To enable the student to

- Understand and explain behavior in social settings
- Explain the psychological aspects of various social phenomena
- To create awareness about the management of human behaviour in group settings

Course Outcomes

CO1	To understand the origin and development of Social Psychology
CO2	To understand the methods of social psychology
CO3	To understand the elements of social perception
CO4	To analyse the theoretical perspectives of attribution
CO5	To understand the relation between attitude and behavior
CO6	To understand the nature and functions of Groups
CO7	To understand the principle of compliance
CO8	To understand the nature of Interpersonal Attraction
CO9	To analyse the theoretical perspectives of Prosocial Behavior

Module 1: Introduction to Social Psychology**10 hours**

Origin and Development of Social Psychology, Definition, Nature, Goal and Scope of Social Psychology, Methods of social psychology

Module 2: Social perception and Attitudes**13 hours**

Social Perception-Definition, Non-Verbal Communication- facial expression, gazes, stares, body language, touching, deception and micro expressions.

Attribution - Definition, Theories - Correspondence inference, Kelly's theory, Applications of attribution theory, Attribution Errors.

Attitude and behavior - Definition, nature, components, functions and formation of attitudes.

Module 3: Group, Leadership and Social Influence**13 hours**

Groups: nature and functions. Types and theories of leadership. Social facilitation, social loafing.

Social influence: Conformity, Factors affecting conformity. Compliance: Underlying Principles and tactics. Obedience and destructive obedience

Module 4: Interpersonal attraction and prosocial behavior

12hours

Interpersonal attraction: beginning of attraction, proximity, emotions, affiliation need. Becoming acquainted- situational determinants-Love- Triangular Model of love.

Prosocial behavior -Responding to emergency, Steps, Altruistic personality, Volunteering. Explaining prosocial behavior: Empathy altruism model, negative state relief model, empathic joy hypothesis, genetic determinism

B.SC PSYCHOLOGY**SEMESTER V****PSY5B03****Credits: 3****DEVELOPMENTAL PSYCHOLOGY –I****48 hours****Objectives:**

- To study human development in Psychological Perspectives
- To create awareness about major Psychological changes along with physical and cognitive development

Course Outcomes

CO1	To understand the historical background of developmental Psychology
CO2	To differentiate between growth and development
CO3	To analyse the theoretical perspectives of development
CO4	To understand prenatal development
CO5	To understand physical development from infancy to adolescence
CO6	To analyze the theories of cognitive development

Module 1: Introduction and theories to Life Span Development**10 hours**

Historical foundation of developmental psychology. Growth and development- Different Theories of development (Brief): Freud, Behaviorist, social learning, Vygotsky, Periods of Development and Erikson's Theory. Developmental tasks of each stages of development.

Module 2: Prenatal Development**14 hours**

Fertilization- Germinal Period, Embryonic Period, Fetal Period- Effect of long term & short term use of Teratogens- Birth Process: Types, methods- prenatal and perinatal diagnostic tests. Birth Complication and their effects. Post partum period- physical, emotional adjustment.

Module 3: Physical Development**10 hours**

Newborn reflexes, Gross and fine motor skills. Perceptual development in infancy. Physical development from childhood to adolescence. Physical condition and health issues in early & middle adulthood.

Module 4: Cognitive Development**14hours**

Piaget's theory of Cognitive Development: Process of development, 4 stages- Sensory Motor, Preoperational, Concrete operational and Formal Operational stage. Language development: Pre-linguistic, Phonological, Semantic, Grammatical and Pragmatic Development .Cognitive changes in early adulthood- Post formal thought, Schaie's Model of Cognitive Development, Sternberg - Cognitive Development of middle adulthood.

B.SC PSYCHOLOGY**SEMESTER V****PSY5B04****Credits : 3****PSYCHOLOGICAL COUNSELLING****48 hours****Objectives:**

- To acquire theoretical knowledge in the areas of psychological counseling
- To understand the applications of counseling in various settings
- To practice counseling techniques through role plays

Course outcomes

CO1	Understand the characteristics, goals and scope of counselling
CO2	Acquire theoretical knowledge in the areas of Psychological counselling
CO3	Understand the approaches to counselling
CO4	Practice counseling techniques through role plays
CO5	Apply counseling skills in various settings.

Module 1:**16 hours**

Counseling and Helping. Definition and scope of Counselling. Goals of counseling. Conditions facilitating effective counselling. Counsellor and counsellee characteristics. Characteristics of an effective counsellor.

An overview of Egan's Model – Problem-management and Opportunity-development approach to Helping – Outline of the three stages. Stage 1 – The Current Picture: Help clients clarify the key issues, Stage 2- The preferred picture: Help clients identify and set goals. Stage 3- The Way Forward: Help clients develop strategies and plans for goal implementation

Module 2:**8 hours**

Approaches to counselling: Person-centered counselling, Psychoanalytic counselling, Cognitive counselling, Behavioral counselling, Eclectic approach

Module 3:**14 hours****Counselling Skills and Techniques**

Opening Techniques – Greeting, topics, physical arrangements, attitudes, Non verbal skills

(SOLER), Rapport building. Listening techniques - Active listening, forms of poor listening

Open-ended questions, Silence, Focusing, Empathic responding, Paraphrasing and reflecting, Probing and Summarising, Structuring

Acceptance techniques, Structuring techniques, Leading techniques, Reassurance and suggestion methods, Challenging, Interpretation & confrontation, Timing & Pacing, Advanced empathy

Divergent thinking, Goal setting, Decision making, Problem solving, Role playing, Advice and information giving strategies, Terminating skills

Module 4:

10 Hours

Applications of Counselling in various settings (briefly): School counselling, Career Counseling and Guidance, College counselling, Premarital counselling, HIV/AIDS counselling, counselling for terminally ill. Group counseling

Values in counselling. Ethics in counselling. Legal aspects in counselling. Professional codes.

Note: A few major skills like active listening, paraphrasing and reflecting are to be practiced through role plays in the class.

B.SC PSYCHOLOGY**SEMESTER V****PSY5B05****Credits: 3****HEALTH PSYCHOLOGY****48 hours****Objectives:**

- To understand the Psychological, behavioral and cultural factors contributing to physical and mental health
- To study the management of different illnesses

Course Outcomes

CO1	Understand the mind-body relationship
CO2	Acquire theoretical knowledge in the models of health behavior
CO3	Identify the psychological factors in stress
CO4	Distinguish between problemfocused and emotion-coping strategies to stress
CO5	Develop skills for management of advanced and terminal illness

MODULE 1: INTRODUCTION TO HEALTH PSYCHOLOGY**12 hours**

Definition of Health Psychology, Mind Body Relationship, Need And Significance of Health Psychology, Biopsychosocial Model V/S Biomedical Model

MODULE 2: HEALTH BEHAVIOUR AND PRIMARY PREVENTION**12 hours**

Health Behaviours, Changing Health Habits-Attitude Change, Cognitive Behavioural Approach-Health Belief Model, Theory Of Planned Behaviour, Trans Theoretical Model, Protection Motivation Theory, Social Cognitive Theory And Attribution Theory, Models Of Prevention

MODULE 3: STRESS AND COPING**12 hours**

Stress, Theoretical Contributions To Stress-Fight-Flight, Selye's General Adaptation Syndrome, Tend –Befriend, Psychological Appraisal & Stress, Coping: Moderators Of Coping-Personality, Social Support, Other Life Stressors, Stress Management Programmes

MODULE 4: PSYCHOSOCIAL ISSUES AND MANAGEMENT OF ADVANCING AND TERMINAL ILLNESS**12 hours**

Emotional Responses To Chronic Illness, Psychosocial Issues —Continued Treatment, Issue Of Non Traditional Treatment, Stages To Adjustment To Dying, Psychological Management Of Terminal Illness, Medical Staff And Terminal Ill Patient, Individual Counselling, Family Therapy, Management Of Terminal Illness In Children

OPEN COURSE

One among the following three courses may be offered by Departments of Psychology for other students

CHOICE I

CODE: PSY5D01 PSYCHOLOGY AND PERSONAL GROWTH Credit : 3

CHOICE II

CODE: PSY5D02 LIFE SKILL APPLICATIONS Credit : 3

CHOICE III

CODE:PSY5D03 CHILD AND ADOLESCENT MENTAL HEALTH Credit:3

OPEN COURSE

To be offered by Department of Psychology for other students

OPEN COURSE CHOICE I**SEMESTER V****PSY5D01****Credits : 3****PSYCHOLOGY AND PERSONAL GROWTH****48 hours****Objectives:**

- To understand the basic concepts in Psychology
- To acquaint with the students with the aspects of personal growth

Course Outcomes

CO1	Develop skills required for effective living
CO2	Recognise the inner gifts, passion and purpose of life
CO3	Express authentic relationship with self and others for personal growth
CO4	Clarify inner and outer boundaries for expansion
CO5	Execute change in society for the betterment of humanity

Module 1 : Introduction to Psychology**10 hours**

Psychology: Definition, goals of psychology, application of psychology in personal and social life : Branches of psychology

Module 2 : Positive Psychology**14 hours**

Positive Psychology: definition, assumption, and goals. Well-being : Definition, subjective and psychological well-being, eastern and western perspectives of well-being. Hope, Optimism, Mindfulness.

Module 3 : Happiness**14 hours**

Positive emotions and negative affectivity. Happiness : Causes and effects of happiness, Happiness across life span, Gender, Marriage, Money and culture in happiness, Close relationship and happiness.

Module 4 : Methods of personal growth**10 hours**

Stress : Distress and eustress, responses to stress, stress management techniques. Meditation and yoga techniques for enhancing personal effectiveness. Resilience : Definition, Risk, protective factors of resilience, Models of resilience

OPEN COURSE**To be offered by Department of Psychology for other students****OPEN COURSE CHOICE II****SEMESTER V****PSY5D02****Credits : 3****LIFE SKILL APPLICATIONS****48 hours****Objectives:**

- To promote life skill education
- To develop abilities for adaptive and positive behavior
- To enhance self-confidence and self-esteem

Course Outcomes

CO1	Understand the importance of life skills
CO2	Develop skills for adaptive and positive behavior
CO3	Develop skills for effective communication, negotiation and survival
CO4	Understand the applications of life skill training

Module 1 : Introduction**8 hours**

Life Skill: Concept, meaning, definition, need, Importance, Ten core life skills.

Module 2: Self awareness, Empathy and Problem solving**12 hours**

Self awareness: concept, importance of self awareness, skills to become self aware and benefits of self awareness in real life.

Empathy: Need for empathy, importance of empathy in building relationships, benefits of empathy in real life. Problem solving: Steps of problem solving, using problem solving skill in solving real life problems

Module 3 :Survival Skills, Effective communication and Negotiating skills**14 hours**

Survival Skills: Interpersonal relations-building of interpersonal relations, skill to improve interpersonal relations

Effective communication: listening skills, verbal and non verbal communications.

Negotiating skills: decision making-importance of effective decision making in real life, career decision making

Module 4: Life skill in different area**14 hours**

Life skill for preventing addiction-life skill for career planning and development-life skill for women empowerment-life skill training for various groups

(Adolescents, youth).

OPEN COURSE

To be offered by Department of Psychology for other students

OPEN COURSE CHOICE III**SEMESTER V****PSY5D03****Credits : 3****CHILD AND ADOLESCENT MENTAL HEALTH****48 hours****Objectives:**

- To gain knowledge about the importance of mental health along with physical health
- To understand general mental health issues during developmental years
- To get an insight about how to effectively handle the general mental health problems

Course Outcomes

CO1	Understand the importance of mental health in children
CO2	Understand the mental health issues of children
CO3	Develop skills for management of mental health of children
CO4	Understand the role of mental health professionals in mental health

Module 1:**10 hours**

Definition of Mental Health (WHO), Prevalence of mental health issues in young people, Assessment of mental health issues in children and adolescents: Interview, Case study, Observation, Psychological testing (in brief)

Module 2:**12 hours**

Factors affecting mental health in young children (brief description): Biological factors , Psychological factors: Intellectual factors, Temperament, Environmental factors: Role of parenting, peer influence, Impact of school, Impact of culture and community

Module 3:**16 hours**

General mental health issues (brief description of): Emotional problems: Separation anxiety, social anxiety. Behavioural problems: Temper tantrums, conduct disorders, risk taking behavior, bullying, alcohol and drug abuse. Other common mental health issues: Attention Deficit Hyperactivity Disorders, Learning Disability, Depression and self harm and Schizophrenia.

Module 4:**10 hours**

Basics of management of Mental Health Issues (brief description):-Counselling, Psychoeducation, Behaviour Therapy, Cognitive Behaviour Therapy, Play Therapy, Family Intervention.

Mental health professionals:- Psychiatrist, School Psychologist, Clinical Psychologist, Social Worker.

B.SC PSYCHOLOGY
SEMESTER V
EXPERIMENTAL PSYCHOLOGY PRACTICAL II **48 hours**

Objectives:

- To nurture the ability in students to understand himself/herself and other persons.
- To develop the skills of testing and scientific reporting in psychology.
- To familiarize the students to various psychological tests and assessment tools.
- To generate an interest in working of the community with a psychological outlook

Course Outcomes

CO1	To develop the skills for assessment of learning
CO2	To apply learning principles
CO3	To develop the skills for assessment of level of aspiration

PART I

Learning

1. Massed v/s spaced learning
2. Rote V/s Meaningful learning
3. Trial and error learning

Transfer of training

4. Bilateral transfer
5. Habit interference

Motivation

6. Level of aspiration
7. Knowledge of result

Each student is required to conduct any 6 experiments and submit record for evaluation at the end of the semester. The list includes experiments that measure learning and motivation. Evaluation will be made at the end of sixth semester(PSY6B06) .

B.SC PSYCHOLOGY**SEMESTER V****PROJECT****16 hours**

CO1	Develop the skills for writing a research proposal
CO2	Develop the skills for conducting research
CO3	Develop the skills for writing a research project

Pursuing a *research project* enables students to pursue an original study about a topic of interest. Students are expected to conduct a small project on socially relevant topics. Project work should be carried out with the supervision of faculty members in the department. The project work must be started from the fifth semester onwards and students should submit their report at the end of sixth semester.

Guide lines for the Project work

- The project work shall be a quantitative, qualitative or exploratory study and the use of simple statistical techniques may be encouraged.
- Students must do the project work individually and submit the report in manuscript format (handwritten form).
- Preferably tool can be prepared by the students themselves such as interview schedule, observation schedule, questionnaires, categories of content analysis etc
- Authenticity of the project work should be verified.
- The report should not exceed 30 pages
- The report must have five chapters such as Introduction, review, method, result and discussion, summary and conclusion and reference (APA format).
- An abstract of the study should be submitted along with the research report.
- The project will be valued both internally and externally

B.SC PSYCHOLOGY

SEMESTER VI

PSY6B01

Credits : 3

ABNORMAL PSYCHOLOGY-II

64 hours

Objectives:

- To develop awareness about major psychological disorders
- To acquaint the students with causes of major psychological disorders

Course Outcomes

CO1	To understand the clinical features of substance abuse disorder
CO2	To identify the signs and symptoms of Schizophrenia and other Psychotic disorder
CO3	To understand the causal factors of Schizophrenia and other Psychotic disorder
CO4	To identify the signs and symptoms of Mood disorders
CO5	To understand the causal factors of Mood disorders
CO6	To identify the signs and symptoms of Developmental disorders
CO7	To understand the causal factors of Developmental disorders

Module 1: Substance abuse disorder

18 hours

Alcohol Related Disorders - Clinical Picture of Alcohol Related Disorders, Biological Causal Factors in the Abuse of and Dependence on Alcohol, Psychosocial Causal Factors in Alcohol Abuse and Dependence, Sociocultural Causal Factors. Drug Abuse and Dependence - Opium and Its Derivatives (Narcotics), Cocaine and Amphetamines (Stimulants), Methamphetamine, Barbiturates (Sedatives), Hallucinogens, Ecstasy, Marijuana, Stimulants

Module 2: Schizophrenia and other psychotic disorder

18 hours

Schizophrenia - Origins of the Schizophrenia Construct, Epidemiology, Clinical Picture- Delusions, Hallucinations, Disorganized Speech and Behavior, Positive and Negative Symptoms. Subtypes of Schizophrenia, Other Psychotic Disorders -Schizoaffective Disorder, Schizophreniform Disorder, Delusional Disorder, Brief Psychotic Disorder. Causal factors

Module 3: Mood Disorder

16 hours

Mood Disorders: Types of Mood Disorders. Unipolar Depressive Disorders -Major Depressive Disorder, Other Forms of Depression, Premenstrual Dysphoric Disorder, Dysthymic Disorder

(Persistent Depressive Disorder). Bipolar and Related Disorders-Cyclothymic Disorder, Bipolar Disorders (I and II) .Causal Factors.

Module 4: Developmental disorders

12hours

Attention-Deficit/Hyperactivity Disorder, Conduct Disorder, Autism Spectrum Disorder, Specific learning Disorders, Intellectual Disability. Causal factors

SEMESTER VI

PSY6B02

Credits : 3

APPLIED SOCIAL PSYCHOLOGY

64 hours

Objectives:

- To familiarize the theoretical concept and research methods in applied Psychology.
- To give knowledge about application of Social Psychology in different areas like clinical, Educational, health and media.
- To understand the major social issues in India.

Course Outcomes

CO1	To understand the foundations of Applied Social psychology
CO2	To understand the applications of Social psychology in Clinical and Counselling psychology
CO3	To understand the applications of Social psychology in media and aggression
CO4	To analyse the social problems in India
CO5	To apply Social psychology in India

Module 1: Foundations of Applied Social psychology

16 hours

Social psychology and related disciplines. Applied social psychology: historical context. Social Psychological theories- cognitive dissonance theory, group think theory.

Module 2: Applying Social psychology to Clinical and Counseling Psychology

16 hours

Social psychological roots of social anxiety. Social psychological model of depression. Treatment and prevention- self presentation theory, hopelessness theory and biases in clinical decision making.

Module 3: Applying Social psychology to the Media and Aggression

16 hours

Consequence of viewing media violence- fear, aggressive thoughts. Effects of exposure to violent pornography. Reducing the harmful effects of exposure to violent sexual material. Effects of media influence on our thought. Aggression. Theoretical perspectives on aggression: role of biological factors, drive theories, modern theories of aggression. Determinants of aggression: social, personal, situational. Prevention and control of aggression.

.Module 4: Social problems in India and applying Social Psychology**16 hours**

The concept of social problems, characteristics, causes, types, stages in the development of social problems, and solving social problems. Brief description about the concept of poverty, unemployment, population explosion, child abuse and child labor

B.SC PSYCHOLOGY**SEMESTER VI****PSY6B03****Credits: 3****DEVELOPMENTAL PSYCHOLOGY –II****48 hours****Objectives:**

- To study emotional and social development of life span periods.
- To study the vocational development and adjustments in adulthood.
- To understand the period of late adulthood.

Course Outcomes

CO1	Understand the types of emotions and emotional behavior from infancy to middle adulthood
CO2	Understand the different types of temperament
CO3	Understand the theories of social development
CO4	Understand the vocational development and adjustment in early adulthood
CO5	Understand the vocational development and adjustment in late adulthood
Co6	Understand the stages of death and pattern of grieving

Module 1: Emotional Development**12 hours**

Emotion- types of emotions. Emotional behavior in infancy to middle adulthood. Temperament: definition, different classifications. Self development-role of family, parenting and peer relations in emotional development. Close relationships in adulthood. Adult life changes, marriage and family in adulthood.

Module 2: Social Development**12 hours**

Process of socialization from infancy to middle adulthood. Vygotsky's theory of social development - ZPD. Development of attachment: types, Bowlby's Ethological theory of attachment, Factors affecting attachment. Marital Life Style & Parenthood in Young Adulthood. Empty nest syndrome. Attraction, love and close relationships- adult marriage life. Moral development- theories: Piaget, Kohlberg.

Module 3: Vocational Development**12hours**

Vocational development and adjustment in early adulthood. Career, work and leisure in middle adulthood. Selecting a job, appraisal of vocational adjustment. Work life balancing. Vocational

adjustment in Middle Adulthood-Changed working conditions that affect middle aged workers, conditions influencing vocational adjustment and satisfaction in middle age.

Module 4: Late adulthood**12 hours**

Characteristic of late adulthood. Gerontology. Physical –cognitive – language- and socio-emotional development in late adulthood. Development of personality and self. Family and relationships. Biological theories of ageing. Vocational adjustment and adjustment to retirement in late adulthood. Facing death and loss: Psychological issues, Pattern of grieving, special losses.

B.SC PSYCHOLOGY**SEMESTER VI****PSY6B05
ELECTIVES****Credit : 3**

Each student has to opt one elective among the following five courses

1. PSY6B05-01 Organisational Behaviour
2. PSY6B05-02 Psychology of Criminal Behavior
3. PSY6B05-03 Positive Psychology
4. PSY6B05-04 Educational Psychology
5. PSY6B05-05 Cognitive Psychology

B.SC PSYCHOLOGY**SEMESTER VI****PSY6B05-01****Credits : 3****ORGANIZATIONAL BEHAVIOUR****48 hours****Objectives:**

- To familiarize the concept of human Behaviour in Organizations
- To give knowledge about work-motivation, group, leadership and organizational culture

Course Outcomes

CO1	To identify the need and importance of organizational behavior
CO2	Understand the characteristics of individual behavior
CO3	Understand the basis of group behavior and leadership
CO4	Understand the dynamics of organizational behavior

MODULE1: INTRODUCTION TO ORGANISATIONAL BEHAVIOUR**12 hours**

The Concept of Organization – Need and Importance of Organizational Behaviour – Goals-Scope and Challenges of Organization - Organization Structure-Types –Organizational behaviour Models.

MODULE 2: INDIVIDUAL BEHAVIOUR**12 hours**

Attitude – Characteristics – Components – Formation of attitude. Perception–Importance – Factors influencing perception – Interpersonal perception- Impression Management. Motivation - Meaning and types of Motivation, content theories and process theories.

MODULE 3: GROUP BEHAVIOUR AND LEADERSHIP**12 hours**

Concept of groups - Basic groups- Theories of group formation. Communication - Processes of communication in organization-Functions of communication. Transactional Analysis. **Leadership- Functions of a leader-** Approaches to the study of leadership phenomenon.

MODULE 4: DYNAMICS OF ORGANIZATIONAL BEHAVIOUR**12 hours**

Meaning of conflict - The processes of conflict, Types and sources of conflict, Resolution of conflict. Meaning of stress- Work stressors - Consequences and management of stress-

Balancing work and life. Organizational development – Characteristics –Objectives – Organizational effectiveness.

B.SC PSYCHOLOGY**SEMESTER VI****PSY6B05-04****Credits : 3****EDUCATIONAL PSYCHOLOGY****48 hours****Objectives:**

- To promote an understanding of the application of Psychological principles in the process of education.
- To familiarise the students with the characteristics of normal and exceptional children.
- To provide the ways and methods of teaching and classroom management.

Course Outcomes

CO1	Understand the nature and scope of educational psychology
CO2	Understand the child development and learning
CO3	Understand different approaches of motivation
CO4	Develop skills to enhance students' motivation
CO5	Develop skills to educate exceptional children

Module 1: Educational Psychology**10 hours**

Nature and Scope of Educational Psychology – Contribution of Piaget, Vygotsky, Skinner, Rogers and Maslow, Dewey, and Gardener on Education. .

Module 2: Child Development and Learning**10 hours**

Age-level characteristics and education – Physical, social, emotional and cognitive characteristics of Pre-school to Higher secondary students. Role of teacher in each stages of education.

Learning: Behavioural approach – Objectives of instruction – Mastery Learning – Behaviour modification techniques.

Module 3: Motivation**14hours**

Behavioural, Cognitive and humanistic approaches of motivation – Implication of achievement motivation and attribution theories –Techniques for enhancing student motivation. Class room communication- verbal, non- verbal and unintended communication.

Module 4: Educating Exceptional Children**14 hours**

Education of Gifted Children, Juvenile delinquent, Learning Disabled , Mentally Retarded , Physically Disabled , Emotional and Behavioural Disordered. Role of special educator in dealing with exceptional children.

B.SC PSYCHOLOGY**Semester VI****PSY6BO5-05****Credit: 3****COGNITIVE PSYCHOLOGY****48 HOURS****Objectives :**

- To familiarize the field of Cognitive Psychology
- To enable students to gain an understanding about the development of the field of Cognitive Psychology
- Create awareness about the current shading of the field.

Course Outcomes

CO1	Understand the domains and paradigms of cognitive psychology
CO2	Understand the history of cognitive psychology
CO3	Identify the methods of tapping mind
CO4	Understand the basic processes in cognition
CO5	Understand the organization and representation of knowledge

•

Module 1 : Introduction**12 hours**

Define cognitive Psychology, The domains of Cognitive Psychology, Paradigms of Cognitive Psychology: the information processing approach, connectionist approach, evolutionary approach

Module 2 : History and methods**12 hours**

Brief history of Cognitive Psychology: Philosophical, Psychological, and Technological roots

Methods of tapping the mind: Experimental Cognitive Psychology, Cognitive Neuropsychology, Cognitive neuroscience

Module 3 :Basic processes in Cognition**12 hours**

Perceiving objects and recognizing patterns: Gestalt approaches, bottom –up processes, top down processes, Disruptions of perception

Memory: working memory and executive functioning

Module 4: Representation and Organization of Knowledge**12 hours**

Concepts and categorization, theoretical descriptions of the nature of concepts, the nature of mental imagery, Mnemonics and memory codes

B.SC PSYCHOLOGY

SEMESTER VI

PSY6B06

Credits: 4

EXPERIMENTAL PSYCHOLOGY PRACTICAL II

48 hour

Course Outcomes

CO1	To develop the skills for assessment of reaction time
CO2	To develop the skills for assessment of motor skills
CO3	To develop the skills for assessment of conformity behavior
CO4	To develop the skills for assessment of self expression

PART II

1.Simple reaction time

2.Choice reaction time

3.Tracing test

4.Steadiness tests

5.Finger dexterity

6.Tweezer dexterity

7. Conformity Behaviour

8. Social Maturity Scale

9. Self-expression Inventory

10. Parental Encouragement Scale

Each student is required to conduct any 6 experiments from the above experiments and submit record for evaluation at the end of the semester. Evaluation for Part I (V Sem) & Part II (VI Sem) will be made at the end of the sixth semester(PSY6B06).

Pattern of evaluation of Experimental Psychology Practical II

External Evaluation 60 marks		Internal Evaluation 15 marks	
Introduction	10 marks	Lab Involvement/Records Attendance	6 marks
Administration	15 marks		
Result and Discussion	15 marks	Record	9 marks
Record	10		
Viva Voce	10 marks		

B.SC PSYCHOLOGY**SEMESTER VI****PSY6B07****Credits: 4****EXPERIMENTAL PSYCHOLOGY PRACTICAL III****48 hours****Course Outcomes**

CO1	Develop the skills for assessment of personaliy
CO2	Develop the skills for assessment of aptitude
CO3	Develop the skills for assessment of stress levels
CO4	Develop the skills for assessment of spiritualism
CO5	Develop the skills for assessment of risk taking behavior and study habits

PART II

1. 16 PF
2. Weschler adult performance intelligence scale
3. Emotional Intelligence inventory
4. Aptitude Tests
5. IAS rating scale
6. Occupational stress inventory
7. Materialism spiritualism scale
8. Family relationship inventory
9. Risk taking scale
10. Study habit scale

Each student is required to conduct a minimum of 6 tests from the above tests and submit record for evaluation at the end of the semester. Evaluation for Part I (V Sem) & Part II (VI Sem) will be made at the end of the sixth semester(PSY6B07).
