Report

Academic Year 2016-2017

Name of the Event: Workshop on Microscale Analysis

Date: 28-01-2017

Time: 10.00 am -3.30 pm

**Organized by: Post Graduate Department of Chemistry, Vimala College
(Autonomous) Thrissur**

No. of participants: 55

Microscale analysis is the quantitative or qualitative analysis of micro level. Here the sample is taken even in micrograms or microlitres and analysis is carried out. Analysis of elemental, isotopic and molecular constituents is possible. Here, qualitative analysis and separation of organic components are carried out in micro scale and hence the use of the chemicals can be minimized. It consumes less time and offers minimum amount of byproducts.

As an orientation for the microscale analysis, a one day work shop has been conducted by Professor Subair (Rtd), PSMO College, Malappuram on 28th January 2017 for PG students. Microscale analysis has been done in the lab since 2017 and is continuing.
