Report

Academic Year 2020-2021

Name of the Event: International Webinar - "Modern Approaches in Building Secure Web Applications"

Date: 03 Jul 2020

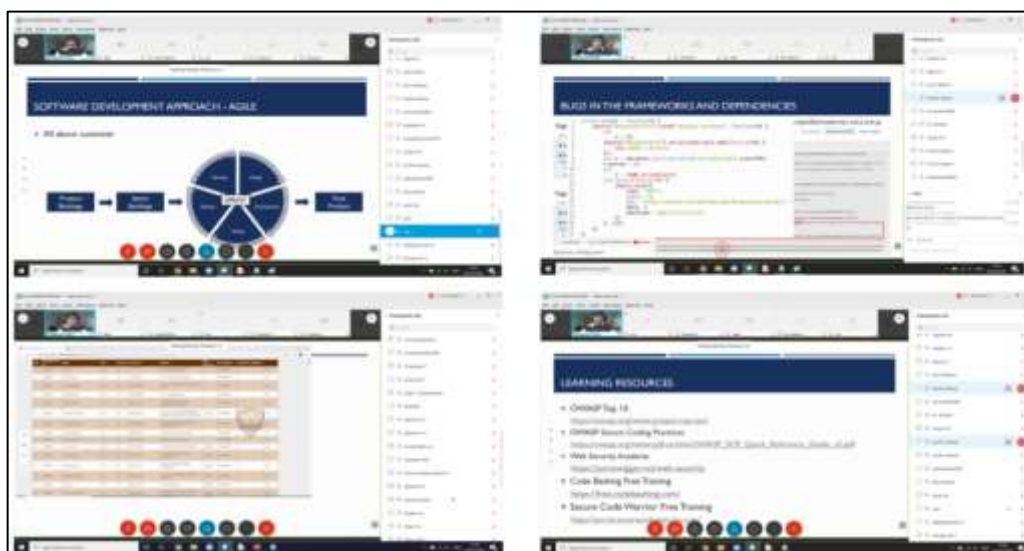

Venue: Cisco Webex

Organized by: BVoc Web Technology

No. of participants: 84

B. Voc Web Technology division of the Department of Computer Science organized an International webinar on “Modern Approaches in Building Secure Web Applications” on 3rd July 2020. Mr. Sanoop Thomas, Security Researcher and Founder of BSides Singapore talked to the participants about the security risks in traditional development approaches and introduced modern development strategies to avoid such potential security threats. Final-year students and faculty members of various institutions attended the webinar and gained insight into ORM techniques, examples of secure Django programming, etc. E-certificates were issued to the participants upon completion of the webinar.
