Sir/Madam

As part of Science popularization Programme Sponsored by KSCSTE, the Department of Botany, Vimala College (Autonomous), Thrissur is organizing a National Seminar on 'Pharmacognosy and Conservation Strategies of Medicinal Plants' on 21st July, 2017.

Plants have been used as healers and health rejuvenators since time immemorial. Even now, WHO recognizes that a medicinal plant plays an important role in the health care of about 80% of world population in developing countries and depend largely on traditional medicines, of which herbal medicines constitutes the most prominent part. Most of the plants used as tribal medicines are less known to the community. These plants are very effective and act as effective source of drug discovery. Hence the popularization and conservation of the medicinal plants is the need of the hour.

This National Seminar will provide opportunities to the participants to interact and share their views with scientists and people working in the field of Conservation and Therapeutic potentials of Medicinal plants. Kindly utilize this opportunity to interact with the experts and enrich your knowledge in the field of Medicinal plant research.

We invite oral and poster presentations in the related area of 'Pharmacognosy and Conservation Strategies of Medicinal Plants'.
