Report

Social work is a practice oriented profession. Post Graduate Course in Social work aims at developing competent and committed professionals who are able to work in a variety of settings with a range of clientele. For this, students need challenging academic and practice learning opportunities that will enable them to acquire, apply and integrate knowledge, skills and values in core areas of practice. These are provided to them through a comprehensive curriculum consisting of theory, field practicum and dissertation. Social work education and training need to keep up with and stay ahead of changes in the social and cultural milieu in which it exists. The client population and their needs also undergo profound changes. Academia Practitioner Interface is visualized as a space where social work practitioners interact with students on a regular basis. They impart their expertise in strategies, skills and information in working with people to the academe. They have an immense wealth of knowledge, skills and right attitude, which is seldom documented and published. The department perceives this practice of practitioner interface as a way of accessing the knowledge and skills required for social work practice. Apart from being up to date, this provides students with an opportunity to get exposed to the practice aspects of the profession.

Objectives

1. To provide opportunities to acquire knowledge about changing nature of clientele and emerging problems
2. To understand the social work responses to the emerging problems

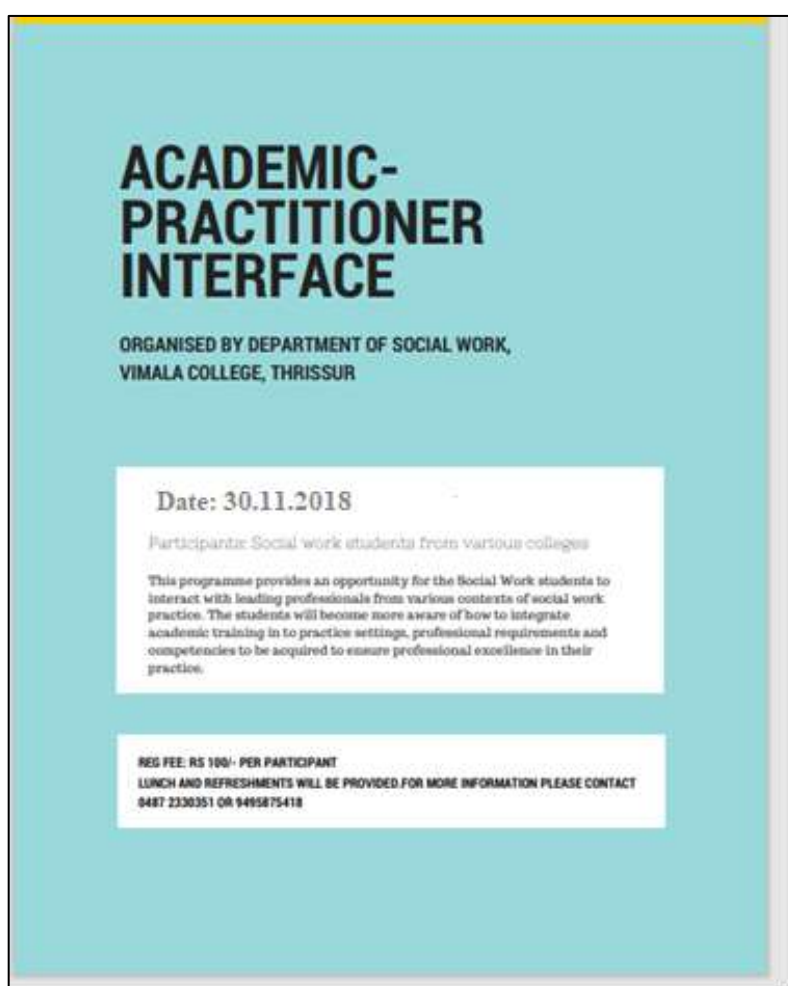

VIMALA COLLEGE (AUTONOMOUS), THRISSUR

3. To update students in the strategies and techniques used in dealing with current problems/needs
4. To familiarize students with the constraints and challenges faced by social work practitioners in various settings
