LETTER OF COLLABORATION

Greetings,

We would like to acknowledge the fruitful collaborations with **Dr. Silvy Mathew**, Department of Botany, Vimala College (Autonomous), Thrissur, Kerala, India in the previous years, where working together we have achieved two scientific publications as well we are working on ongoing projects related with “*Nanotechnological implications on Agri-Food production and their dynamics on root system in mineral uptake, biochemical and toxic activity*”.

A mutual beneficial collaboration between the Institutions to support and fruitful collaboration to support the scientific community and knowledge transfer. Our collaboration can support the understanding and reduction of the knowledge gap in the area of Phytochemistry, biochemical activity in the field of agri-food production using Nanomaterials. *This collaboration could be measured via our scientific publications, collaboration the students, participating in optional courses and seminars between these two Institutions.*

We look forward to a productive research collaboration, students sharing, participation in optional courses between our institutions.

Yours Sincerely

Dr. Dhirendra Kumar Tiwari.
Young Scientist (Nanotechnology).
