

Internship Guidance Cell

Report 2021-22

Internship guidance Cell focuses on making students aware of the importance of internships in their career. The Cell conducts webinars and workshops in this regard. It also helps students to find out various discipline-specific internships accessible to them. The Cell also functions as a connecting link between the students and Internshala (an online internship training platform). In the beginning of the academic year the names and details of newly joined students are uploaded to the Internshala and it helps the students to get updates regarding new internship opportunities.

The Cell organized two webinars in the academic year 2021-22.

A webinar was organized on 22nd December 2021 on the topic “Role of Internships in Building Successful Career.” Ms Aiswarya R, Jr SEO Engineer, IPSR Solutions Ltd was the Resource Person. It was an orientation session for the first-year students. Many students found the session inspirational since the Resource Person shared her own experience of finding an internship at IPSR during her student days and later being recruited as a staff there.

Due to the limitations of Google Meet, the maximum intake for this session is limited to 100 !!

Another webinar was organized by the Cell on 27th January, 2022, another. The topic of the webinar was “Internship as a Gateway to Industry: On Opportunities and Benefits. Mr Mohammed Shahzad and Sumayya PS, CEOs of Cert-Ed Academia, were the resource persons for the session. It was an interactive session where students from first to third year batches got to know more about the benefits of having industry experience even before completing their graduation.
